

# KING TIDES OBSERVATION WALK

JANUARY 3RD

Become a community scientist for the day on this discovery walk. Help protect our wetlands from the impacts of sea level rise by documenting what you see, learn what causes the annual King Tide event and how conservation can help preserve the wetlands from future sea level rise.

WETLANDS EDGE TRAIL | 2 EUCALYPTUS DR  
10:00 AM - 12:00 PM

FREE COMMUNITY DISCOVERY HIKE | EASY, FLAT TERRAIN  
[WWW.ACPARKS.ORG](http://WWW.ACPARKS.ORG)

Parks Foundation Discovery Hikes are casual, observation walks open to all ages. The pace is casual to allow for nature exploration with our program naturalist and volunteers.

Bring your camera along and capture the shoreline changes as part of the **California King Tides Project.**

*This social hike is a program of the American Canyon Community & Parks Foundation. The 1.5 mile loop trail is a flat gravel trail appropriate for most walkers.*
